

Reconditioned Products

The Reconditioning Process

- Each drum is sorted according to condition and type
- Containers are live-flamed in a furnace to oxidize residues
- All remaining paint and residue is removed
- Drums are reformed to their original shape
- Chimes are straightened to original appearance and quality
- Potential leaks are detected through a pressurized wire
- Each drum is sorted according to condition and type
- Drums are Lined or painted to customer specifications.

National Packaging Services uses Kearny Steel Container EXCLUSIVELY for our Reconditioned Steel Drums, Reconditioned Plastic Drums and Reconditioned and Rebottled IBCs

Reconditioned Drums That Give Your Organization an Advantage

With the ever-growing competitive global market, it is more important than ever to have cost-effective, quality container management.

Kearny Steel Container's reconditioned drums are used by companies worldwide to transport everything from chemicals to food. We are your single source for all of your reconditioned container needs.

Kearny Steel Container prides itself as being one of the top reconditioners nationwide. Our reconditioned drums are restored to like-new condition – and are thoroughly tested and inspected for complete reliability. Kearny Steel Container is also fully capable of disposing of all un-reconditionable containers, regardless of size or type.

Convenience and Peace of Mind

We will make pick-ups and deliveries in as little as 24 to 48 hours. Using a state-of-the-art system, each drum is fully reconditioned in compliance with all your requirements, specifications and industry standards.

Kearny Steel Container can also dispose of empty containers that can't be reconditioned, but can be recycled, including cleaning and preparation for scrapping. Our company is fully insured and meets all environmental standards.
